Table 5: Description of mandatory Skeletal Tracking CDF fields recorded for each frame. Any description ending with a * is repeated once per player per frame. Any description ending with a $^{\diamond}$ is repeated once per player per frame per landmark (e.g knee_left, hip_right, ear_right etc.). Note that {i} and {j} are used as indices for items in lists. Landmark names should follow snake-case with any direction indicator as a suffix. Any type ending with a ‡ may be null when the subject is occluded, off-camera or otherwise not captured in that frame.

Root	Field	Description	Type
	frame_id	Unique frame identifier	Integer
	timestamp	Timestamp of the frame in UTC	String
	period	Period of the match which can be first_half, second_half, first_half_extratime, second_half_extratime, or shootout	String
match	id	Unique match identifier	String
teams/{home|away}	id	Unique identifier for the home or away team*	String
teams/{home|away}/players/{i}	id	Unique identifier for a player*	String
teams/{home|away}/players/{i}/landmarks/{j}	name	Name for a landmark$^{\diamond}$	String
teams/{home|away}/players/{i}/landmarks/{j}	x	Relative x coordinate of landmark in relation to the point of origin (m)$^{\diamond}$	Float / null‡
teams/{home|away}/players/{i}/landmarks/{j}	y	Relative y coordinate of landmark in relation to the point of origin (m)$^{\diamond}$	Float / null‡
teams/{home|away}/players/{i}/landmarks/{j}	z	Relative z coordinate of landmark in relation to the point of origin (m)$^{\diamond}$	Float / null‡
teams/{home|away}/players/{i}/landmarks/{j}	is_visible	If landmark is detected (true) or inferred (false) $^{\diamond}$	Boolean
