Table 1: Description of the mandatory Match Sheet Data CDF fields. Any description ending with a * is repeated once per player. Only players named to the match day squad are listed. Any description ending with a † is repeated once per event. Note that {i} is used as an index for the items in a list. Figure 3 describes the specific format for providing results.

Root	Field	Description	Type
match	id	Unique match identifier	String
match/status	is_neutral	Denotes whether the game was hosted in a neutral venue (true) or not (false)	Boolean
match/status	has_extratime	Denotes whether the game went to extra time (true) or not (false)	Boolean
match/status	has_shootout	Denotes whether the game had a penalty shootout (true) or not (false)	Boolean
match/result/final	{home|away}	Result after the final whistle excluding penalty shootout goals (i.e. home goals, away goals)	Integer
match/result/final	winning_team_id	Unique identifier of the winning team, null when the match was drawn and no shootout was played	String / null
match/result/first_half	{home|away}	Result after the first half (i.e. home goals, away goals)	Integer
match/result/second_half	{home|away}	Result after the second half (i.e. home goals, away goals)	Integer
match/result/first_half_extratime	{home|away}	Result after the first half of extra time (i.e. home goals, away goals). Only required if a game goes to extra time.	Integer
match/result/second_half_extratime	{home|away}	Result after the second half of extra time (i.e. home goals, away goals). Only required if a game goes to extra time.	Integer
match/result/shootout	{home|away}	Score for the penalty shootout (i.e. home goals, away goals, shootout goals only). Only required if a game goes to shootout.	Integer
teams/{home|away}	id	Unique identifier for the home or away team	String
teams/{home|away}/players/{i}	id	Unique player identifier*	String
teams/{home|away}/players/{i}	first_name	First name*	String
teams/{home|away}/players/{i}	last_name	Last name*	String
teams/{home|away}/players/{i}	team_id	Unique team identifier denoting the team the player plays for*	String
teams/{home|away}/players/{i}	jersey_number	Jersey number for a player*	Integer
teams/{home|away}/players/{i}	is_starter	Denotes whether a player started the game (true) or not (false)*	Boolean
teams/{home|away}/players/{i}	has_played	Denotes whether a player played in game (true) or not (false)*	Boolean
officials/{i}	id	Unique identifier for the official	String
events/goals/{i}	time	Time a player scored†	String
events/goals/{i}	player_id	Identifier of the player who scored†	String
events/goals/{i}	assist_id	Identifier of the player who assisted, if the goal was assisted else leave as null †.	String / null
events/goals/{i}	team_id	Identifier of the team that scored (for own goals this should be identifier of the team that gained a goal). †	String
events/goals/{i}	is_own_goal	Denotes whether it was an own goal (true) or not (false)†	Boolean
events/goals/{i}	is_penalty	Denotes whether it was a penalty (true) or not (false)†	Boolean
events/goals/{i}/score	{home|away}	Team score after the goal†	Integer
events/substitutions/{i}	in_time	Time in UTC a player is substituted in†	String
events/substitutions/{i}	in_player_id	Unique identifier of the player substituted in†	String
events/substitutions/{i}	out_time	Time the player was substituted out†	String
events/substitutions/{i}	out_player_id	Identifier of the player that is substituted out†	String
events/substitutions/{i}	team_id	Identifier of the team that made the substitution†	String
events/cards/{i}	time	Time in UTC a player received a card†	String
events/cards/{i}	player_id	Identifier of the player who received a card†	String
events/cards/{i}	type	Type of card which can be yellow_card, red_card or second_yellow_card†	String
events/cards/{i}	team_id	Identifier of the team that made the received a card†	String
meta	vendor	Match sheet data vendor name (e.g. "company_a")	String
events/goals/{i}	period	Period of the game when the goal was scored	String
events/substitutions/{i}	period	Period of the game when the substitution occurred	String
events/cards/{i}	period	Period of the game when the card was shown	String
