Table 12: Description of optional Match Meta CDF continuation from Table 11. Note that {i} is used as an index for the items in a list.

Root	Field	Description	Type
match/periods/{i}	frame_id_start	Frame identifier for the tracking data related to the start of the period	Integer
match/periods/{i}	frame_id_end	Frame identifier for the tracking data related to the end of the period	Integer
match/periods/{i}	left_team_id	Unique team identifier of the team playing on the left side of the pitch in this period. The CDF requires a standardized playing direction (see Section 3.3). The left_team_id and right_team_id should be the actual, non-standardized sides.	String
match/periods/{i}	right_team_id	Unique team identifier of the team playing on the right side of the pitch in this period.	String
match/periods/{i}	start_time	Start time of the period in UTC	String
match/periods/{i}	end_time	End time of the period in UTC	String
teams/{home|away}/players/{i}	last_name	Last name of the player, null if not available	String
teams/{home|away}/players/{i}	first_name	First name of the player, null if not available	String
venue	pitch_length	Length of the pitch in metres, null if not available	Float
venue	pitch_width	Width of the pitch in metres, null if not available	Float
officials/{i}	id	Unique identifier for the official	String
officials/{i}	first_name	First name of the official, null if not available	String
officials/{i}	last_name	Last name of the official, null if not available	String
officials/{i}	short_name	Short name of the official, null if not available	String
officials/{i}	type	Role of the official (e.g., 'main_referee', 'assistant_referee', 'fourth_official')	String
