

Table 5: Description of mandatory Skeletal Tracking CDF fields recorded for each frame. Any description ending with a ^{*} is repeated once per player per frame. Any description ending with a [°] is repeated once per player per frame per landmark (e.g knee_left, hip_right, ear_right etc.). Note that {i} and {j} are used as indices for items in lists. Landmark names should follow snake-case with any direction indicator as a suffix. Any type ending with a [‡] may be null when the subject is occluded, off-camera or otherwise not captured in that frame.

Root	Field	Description	Type
	frame_id	Unique frame identifier	Integer
	timestamp	Timestamp of the frame in UTC	String
	period	Period of the match which can be first_half, second_half, first_half_extretime, second_half_extretime, or shootout	String
match	id	Unique match identifier	String
teams/{home away}	id	Unique identifier for the home or away team [*]	String
teams/{home away}/players/{i}	id	Unique identifier for a player [*]	String
teams/{home away}/players/{i}/landmarks/{j}	name	Name for a landmark [°]	String
teams/{home away}/players/{i}/landmarks/{j}	x	Relative x coordinate of landmark in relation to the point of origin (m) [°]	Float / null [‡]
teams/{home away}/players/{i}/landmarks/{j}	y	Relative y coordinate of landmark in relation to the point of origin (m) [°]	Float / null [‡]
teams/{home away}/players/{i}/landmarks/{j}	z	Relative z coordinate of landmark in relation to the point of origin (m) [°]	Float / null [‡]
teams/{home away}/players/{i}/landmarks/{j}	is_visible	If landmark is detected (true) or inferred (false) [°]	Boolean
